

# Genus Fossil Free High Impact Equity Fund

## INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

For the period ended June 30, 2018

---

This Interim Management Report of Fund Performance contains financial highlights, but does not contain either the complete interim financial statements or the complete annual financial statements of the Fund. You can get a copy of the interim financial statements and annual financial statements at your request, and at no cost, by calling 1-800-668-7366 or by writing to us at 860 - 980 Howe Street Vancouver, British Columbia V6Z 0C8, or by visiting our website at [www.genuscap.com/Financial-Reports-Prospectus](http://www.genuscap.com/Financial-Reports-Prospectus) or SEDAR at [www.sedar.com](http://www.sedar.com). Security holders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

## Management Discussion of Fund Performance

### Investment Objective and Strategies

This Fund follows a sustainable thematic approach and invests in common shares of small, medium and large-cap global companies. The Fund integrates broad Environmental, Social and Governance (ESG) criteria, and excludes all issuers directly involved in the extraction, processing and transportation of fossil fuels.

This Fund is unique in that it aims to support both financial and sustainable returns. With respect to financial results, it strives to outperform global stock markets. The pooled fund also seeks to help improve the world by investing in companies offering leading environmental and social solutions.

Genus Capital Management Inc. (the Fund's Manager) begins by identifying the world's 150 most sustainable companies based on products, services and programs that support the following themes: renewable energy, energy efficiency, water and waste management, access to education, health care, financial services and technology and sustainable agriculture. Next, the manager selects a portfolio of the top 20 to 40 companies through a quantitative multi-style discipline that evaluates opportunities based on value, growth, expectation, momentum, quality and sustainability.

### Risk

There were no significant changes to the investment objective and strategies that affected the Fund's overall level of risk during the reporting period and the risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Simplified Prospectus.

### Results of Operations

The Fund's net asset value increased to \$26.4 million as at June 30, 2018 from \$25.4 million as at December 31, 2017. Over the past six months, the Fund's net return was -1.34% versus 0.76% benchmark. The Fund's return is after the deduction of expenses.

The first half of the year saw markets rebound on the back of strong first-quarter earnings and improving investor sentiment. Although trade war tensions remain high, markets edged higher as they brushed off new and ongoing threats from national leaders.

The S&P 500 performed well following the first-quarter downturn. It gained 3.41% (5.51% in CAD terms) in the second quarter led by the Consumer Staples and Information Technology sectors, while Financials and Industrials were the largest drags on performance slipping -0.46% and -0.32% respectively.

In Canada, market confidence returned despite intra-provincial conflicts over pipelines and heightening tensions around trade with the US. The TSX gained 6.59% over the quarter led in part by the Industrials sector, which contributed 0.93% to the index. Other positive performers included the IT, Health Care, and Materials sectors.

Political tensions and trade dominated headlines during the second quarter, generating a lot of noise. All eyes were on what turned out to be an uneventful photo op—instead of an historic summit—between the US and North Korea. The tariffs targeted at China go beyond just fixing trade deficits. They have broader implications for the ongoing technology race and intellectual property battles between China and the US. Volatility is likely as we move through the third quarter as China retaliates in a tit-for-tat cycle.

With the steel and aluminum tariffs exemptions expiring at the end of May, and a lack of progress in talks between the US and its allies, many nations replied with calculated, one-for-one counter tariffs against the US. The European Union (EU) kicked things off a week before Canada by placing tariffs on €2.8 billion worth of US exports. Tensions escalated when President Trump aimed his sights on European automakers, prompting investors to fear a full-blown trade war.

Canada's relationship with the US under President Trump, rocky at best, reached new lows in May. The two leaders openly criticized each other after the G7 meeting as trade talks worsened. Canada fired back just before quarter end with tariffs worth CAD\$16.6 billion on items ranging from steel and aluminum to orange juice, frozen pizza and beer. Despite the escalating threats and harsh rhetoric, we believe cooler heads will prevail. But we do not expect to see a NAFTA deal until after the US midterm elections in November.

European political uncertainty set off alarm bells in early June. Fears of Italy leaving the EU and writing off its debt sent panic rippling through the bond markets. The spread between Italian and German bond yields, a measure of market risk, surged to levels not seen since 2013. Unsurprisingly, as the third-largest bond market in the world, Italy dragged bond yields lower. This trend was not confined to the EU. As investors sought safe havens volatility gripped markets across the globe. It abated in the end, but skepticism is still a driving force. The bond market has since remained-range bound, but at a lower rate than before Italy spooked investors.

For the Genus Fossil Free High Impact Fund, we had a -1.09% gross return (in USD terms) versus the benchmark of 0.76%. The underperformance was due to a few factors including our zero allocation in the Energy sector. Energy appreciated 7.03% within the time period, beating the overall index significantly. Other factors include the selection of underperforming stocks in Consumer Discretionary and Consumer Staples.

Top performers were Umicore (Materials), ServiceNow (Information Technology), and Dassault Systems (Information Technology). The bottom performers were First Solar (Information Technology), Cadence Design (Information Technology), and Berkeley Group Holdings (Consumer Discretionary).

## Recent Developments

Considering the uncertainty surrounding a possible trade war and the potential for further US rate hikes through the rest of the year, we hold a more balanced view between equities and fixed income for the third quarter. From a country bets perspective, we favour the US because of its stronger economic data and more solid fundamentals. We are not overly optimistic about markets represented by the Europe, Australasia and the Far East (EAFE) Index due to a range of market-specific factors including trade tensions, Brexit negotiations and the potential knock-on effects on the banking system caused by a shaky Italian political scene.

In terms of sector exposures, we are starting to favour some defensive sectors, including Health Care and Telecoms. On the other hand, we still favour Consumer Discretionary the most among cyclical sectors. We have shifted IT and Materials back to neutral, because of their exposure to fallout from a potential trade war. We still view Financials negatively given current levels of market volatility.

## Related Party Transactions

Genus Capital Management Inc. is the manager and portfolio advisor of the Fund and is responsible for the Fund's day-to-day operations. Genus Capital Management Inc. is considered a related party of the Fund. The Fund pays the Manager a management fee as compensation for its services in respect of Series F units. The annualized management fee for the Series F units is 0.65% (subject to applicable taxes). During the period ended June 30, 2018, the Series F units paid the Manager \$0 in management fees because no Series F units have been distributed as at the date of this document.

## Management Fees

The Fund pays an annual management fee to the Manager to provide or arrange to provide management and administrative services in respect of Series F units. The fees are calculated based on a percentage of the net asset value of Series F units of the Fund on each valuation day and are paid on a monthly basis. The annualized management fee for the Series F units of the Fund is 0.65% (subject to applicable taxes). During the period ended June 30, 2018, the Series F units paid the Manager \$0 in management fees because no Series F units have been distributed as at the date of this document.

In respect of Series O units, no management fees are paid by the Fund. The unitholder of Series O pays the Manager a negotiated management fee outside of the Fund.

**Financial Highlights (in USD)**

**The Fund's Net Assets Attributable to Holders of Redeemable Units per Unit**

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the applicable periods indicated. The Fund became a reporting issuer on October 23, 2017.

<b>Series O</b> <small>*Series O units are only offered by way of private placement</small>	<b>2018</b> <b>Jun 30</b>	<b>2017</b> <b>Dec 31</b>

1 This information is provided as at June 30 and December 31 of the year shown; unless noted otherwise.

2 Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.

3 The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

4 The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

**PAST PERFORMANCE (in USD)**

As the Fund has been a reporting issuer for less than a year, past performance data is not available.

**Summary of Investment Portfolio**

As at June 30, 2018
